Presentation

Full time, mid-senior working as a software engineer, I'm currently living in Rio de Janeiro - RJ, working for a consultancy company called Compass.UOL, with employees both in Brazil and USA. Thanks to this fact, I'm eventually participating in meetings, both in Portuguese and English, where I usually take the opportunity to improve my skills, both listening, and also speaking, whenever I can.

In my current team, I use Net 6 and C# to create and maintain the admission systems used for new students in one of the major universities groups in Brazil, and, I also use tools such as Entity Framework, AutoMapper and Mediatr, besides Oracle SQL for legacy applications, and multiple PostgreSQL instances for the current micro services.

Besides, in my free time, I'm always trying to gain new skills, and, as a result of such, I've developed skills in front-end development, where, not only improved a lot my knowledge in HTML and CSS, but also, I'm able to work with web applications with Javascript, Typescript, and Also using framework, such as Angular and React.

Experiences

Compass.UOL

Desenvolvedor Pleno III - June, 2024 - Current

- Promoted from the previous position, as a signal of personal, and professional growth;

Desenvolvedor Pleno I - February, 2022 - May, 2024

- Started working for an IT consultancy, where I had a deep dive in micro services, multiples database instances, and message queues;
- Dealt with applications in different areas, from student's financial programs to student's admission services;
- Improved a lot of the knowledge I already have on database maintenance, and also started using tools, inside the Azure DevOps platform, to operate the execution of scripts.

Nasajon Sistemas

Desenvolvedor Pleno I - October, 2020 - January, 2022

- Promoted from the previous position, after I eliminate the bugs passive from the accountant integration software;

Desenvolvedor Júnior - October, 2018 - September, 2020

- Became part of the team, after showing remarkable proficiency as an intern, dealing with the responsibility as a professional since my days as an intern.

Estagiário - September, 2017 - September, 2018

- Started my professional career in a software house, which is responsible for developing new features, and maintaining ERP software.
